

# Support Your Immune System with **Good Nutrition**

There are times when it's essential to strengthen your immune system. Good nutrition plays a vital role by providing key nutrients for immune health support.

**ANTIOXIDANTS**  
Vitamins C & E to help protect immune system cells

**ZINC**  
Needed for production of new immune system cells

**PROTEIN**  
Essential macronutrient for the creation of antibodies and immune system cells

**VITAMINS A & D**  
Help regulate immune system function

## ADDITIONAL IMMUNE HEALTH HABITS\*

Wash your hands often for at least 20 seconds

Avoid close contact with people who are sick

Avoid touching your eyes, nose, and mouth

Stay home when you're sick

Use a tissue when coughing or sneezing

Disinfect surfaces and frequently touched objects

## ORAL NUTRITION SHAKES HAVE NUTRIENTS THAT CAN HELP SUPPORT IMMUNE HEALTH

Sometimes it's hard to get enough of all the immune system supporting nutrients you need from your diet alone. Drinking oral nutrition shakes is a convenient way to help supplement your diet. Look for shakes that contain the key nutrients protein, vitamin A, antioxidants, zinc, and vitamin D.
