

WHY PEDIALYTE®?

NOT ALL HYDRATION IS CREATED EQUAL

Illnesses like influenza and coronavirus may be accompanied by dehydrating symptoms like fever, coughing, diarrhea and vomiting.

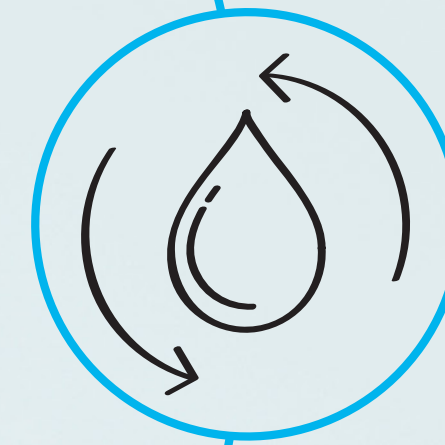

Rehydration requires both fluids and electrolytes like sodium, potassium and chloride to help regulate the body's temperature and maintain the function of muscles and the nervous system.

Pedialyte is an oral electrolyte solution backed by expert guidelines and used for almost 50 years.

Pedialyte has the AAP-recommended balance of sugar and sodium to promote absorption and replenish fluids and electrolytes.⁽¹⁾

Pedialyte AdvancedCare+ has 3x⁽²⁾ the electrolyte sodium as sports drinks. Sports drinks have 2X the sugar as Pedialyte and can make symptoms worse.⁽³⁾

#1 Pediatrician & Pharmacists Recommended Brand.

Has preactive probiotics to help promote digestive health.
